

FEND Nanodegree Learning Plan

Begin the program by learning the building blocks of front-end web development — including HTML, CSS, and an introduction to responsive web design.

Week 1

Time (hours)	Activity	Notes
1	Review Orientation material	Classroom opens on Tuesday.
1 ½	Complete HTML Syntax lesson	Set up your development environment for writing HTML and learn basic tags and syntax.
1	Complete HTML Syntax Problem Set lesson	Get practice creating HTML documents and writing tags with this collection of fun challenges.
1	Complete CSS Syntax lesson	Learn the basics of CSS syntax and get started adding style to your websites.
2	Complete CSS Syntax Problem Set lesson	Practice writing CSS and styling websites while exploring new properties in this problem set.
1	Complete How to Write Code Faster lesson	Learn tips, tricks, and shortcuts to improve your developer workflow and customize your code editor with packages and themes.
1	Complete Why Responsive? lesson	Explore the case for responsive design. You'll see how the experience of using the web changes from one device type to another.
