

FEND Nanodegree Learning Plan

Continue your learning of responsive web design. Then, learn to write READMEs using Markdown. Documentation is an important part of the development process, after all!

Week 2

| Time (hours) | Activity | Notes |
|--------------|--|---|
| 1 | Complete Starting Small lesson | Use the best practices in responsive design to start building from the smallest devices (mobile phones) up to the largest displays (desktop computers). |
| 1 | Complete Building Up lesson | Use media queries to define breakpoints in your application to easily split your site into different versions based on display size. |
| 4 | Complete Common Responsive Patterns lesson | Walk through the most popular responsive layout patterns and learn the tools needed to implement them in your own designs. |
| 2 | Complete Optimizations lesson | Learn how to optimize images, tables, and fonts to make for the best responsive layouts. |
| 2 | Complete Writing READMEs lesson | Begin creating effective documentation for your applications by writing README files to help other developers use and read your code. |
| --- | Submit Build a Portfolio Site project | Project is due on Sunday. |
